

RASC Calgary Centre - Astronomy Atlas Index

The **Index** to *Astronomy Magazine's ATLAS of the STARS* was created to augment the **Atlas** which was published by Kalmbach Publishing Co.

The 41 page **Index** was independently created by close examination of every object identified on all 24 double page maps in the **Atlas** then combining all the results into complete indices.

Downloading the Index:

Note - the Index is not useful unless you already own a copy of Astronomy Magazine's ATLAS of the STARS which was published in 2006 – 19 years ago! The Index to the Atlas does NOT contain any star maps.

If you have a printed copy of that old Atlas and you still want the typed index for it, e-mail me at RASCwebmaster@shaw.ca

with the Subject Line:

“I know the Index is useless without the Atlas but I want the index anyway”

and I will arrange to send you the printed index pdf file via e-mail.
